

Highly efficient

Quickly and economically
from A to B – with TRANSLOGICA

TRANSLOGICA 
software for transport companies

A programme for success

The most important feature of software is that it has to function properly and achieve exactly what you expect it to. Ideally, even more than that.

TRANSLOGICA uses the latest Microsoft technologies. Thus, our transport software combines the advantages of many years of practical experience with future-oriented solutions. The result is an all-inclusive system that is easy to operate.

Successful and innovative transport companies use **TRANSLOGICA**.

Allow yourself to be fascinated by our services!

»100% satisfied – from selling, training, installation and support through to this first class programme: the overall package cannot be beaten! The programme convinces with its clarity, simplicity and constant function. We therefore recommend it to all our partners, no matter whether they have their own fleet of vehicles or act as an agent.«

Without any detours

You can easily decide which transport software is the right one for you. The most important determining factor is time saving – because time saving means cost saving, too.

In order that you can organise your daily working procedures as trouble-free as possible, we have developed **TRANSLOGICA** – in cooperation with a range of transport companies that have been using the software successfully already for many years.

TRANSLOGICA is a fast and reliable system that optimally supports the processes and enables easy and quick access to all the information you need. And you are able to keep track of your business. On all routes.

Everything under control

When it comes to controlling, **TRANSLOGICA** impresses with its outstanding qualities. All data, facts and figures of your company are collected, compared and analysed in real time.

Precise filters reliably sort and select your data in order to provide you exactly with those facts and figures that you need for assessing a situation.

With just a few mouse clicks you can always keep your costs and profitability under control. From each individual order to the whole company.

»With enthusiasm and passion on a same level, we want to achieve maximum efficiency in performance. This is only possible with selected business partners, who also aim at providing excellent performance quality. In setup! / TRANSLOGICA we have found such a partner. The reliability of transport software that offers all the necessary features as well as perfect service and support have convinced us!«

Top Logistik GmbH, Kufstein (Austria)

labour saving **leis**
customised **Time**

Customised

TRANSLOGICA is sophisticated transport software that has been proving itself in practice for many years. Nevertheless, we continuously keep developing it – in close collaboration with the transport sector.

You too can strongly influence this further development. In this way, individual problems are solved immediately and personal wishes fulfilled for a reasonable price.

In other words: **TRANSLOGICA** can be customised. To you and the special needs and requirements of your company. Now and in the future.

ure practically oriented
is money more time for you

More time for you

“Time is money!” It may be hard to find a sector in which this sentence is more relevant than in the transport and logistics sector. That is why it is extremely important to enable fast data input and to automate repetitive processes.

TRANSLOGICA is the ideal tool for the fast and accurate processing of orders – from acceptance and recording to storage and archiving (certainly in consideration of all aspects of fiscal law). In addition, all processes of transport managing and dispatch are significantly accelerated.

The result is that you can save a lot of time and labour. And – leaving aside the fact that this also leads to a significant cutting of costs – having a little bit more leisure time also won't do any harm, right?

»In Translogica we have found a transport software system that enables optimal management of the daily business. And with setup! as a flexible partner, who offers “stand-by-development”, we have the opportunity to grow with new business sectors and can immediately react to changes. Setup! realizes new and short term requirements in controlling promptly and without any difficulties. For us, there is no other product on the market that could compete with Translogica.«

InterCargo Services Hohenauer GmbH, Langkampfen (Austria)

As easy as anything

At the latest during our training session, you will notice how simple it is to operate **TRANSLOGICA**. Already after two or three hours you and your staff will be able to work independently with our software.

But don't worry. Also after our training we certainly won't leave you in the lurch. Our primary aim is to build long term partnerships with our clients. That is why we will always be on your side and help you whenever you have a question or problem.

Reliable software that is easy to operate and doesn't need a lot of training, as well as a company in the background that offers excellent service – you will see: **TRANSLOGICA** will convince you.

»It is simple and clearly structured, but nevertheless it meets a wide range of requirements. Data stored in databases can be used for various purposes.«

Hermann Schmid Internationale Gütertransporte GmbH, Brixlegg (Austria)

Paperless and happy

The motto of **set^{up!}** is: "Think logistically."
And since the benefit for the client always has priority, we have developed **TRANSLOGICA** and found with that a comfortable IT solution for the whole processing of logistic orders. One of our main aims is the paperless forwarding agency.

THEMISYS, a document management system integrated in **TRANSLOGICA**, allows the electronic storage of your documents. It categorises and archives them in a simple and efficient way so that you can quickly find them again.

In other words: No annoying storage of stacks of paper anymore and therefore more time for the "real" work – and all the information always available at the push of a button.

Support for any problem

The more importance a company attaches to service, the better its relation to its own product. And we at **setup!** think of software and service as an indivisible entity.

With customised infrastructure we lay the foundations for comprehensive support – by phone, remote maintenance via internet and, if necessary, also directly on-site.

Your contact persons are all specialists in their field and speak your language. Because of their training and experience, they can certainly help you with any problem. Another good reason for choosing **TRANSLOGICA**.

»Translogica turns out to be the perfect companion for the future! Translogica allows us to work fast, efficiently and professionally. With its development team and service, setup! gives this transport software the personal touch that we expect from an IT service provider.«

Experience

set^{up!} is a modern IT service provider, which has been developing customised IT solutions for transport companies already since 1996.

Our aim is to use our wide, 15-year experience of transportation, freight forwarding, logistics and fleet management in order to find optimal solutions for our clients.

At the same time, we are always looking ahead so that we can constantly develop effective strategies and find the best solutions for new developments and trends of the market already in the forefront.

Several locations – one system

Your company has various branch offices, perhaps even spread across different countries? Then you know how important fast, secure and trouble-free exchange of data is.

TRANSLOGICA allows you inter-site access to a common data stock, which means that everyone has access to the same data and same brand new information, no matter where the office is located and where the information had been entered – in Milan, Salzburg, Berlin or somewhere else.

Our transport software has been developed for multinational use and therefore supports every language. The programme mask can be adapted whenever you want. This means that each and every employee can operate our transport software in the local language – because **TRANSLOGICA** speaks your language.

»We have compared a range of competing products, but the decision was clear: Setup! / TRANSLOGICA offers by far the best all-inclusive package for us. From the operative part to controlling, accounting and billing: everything goes hand in hand. Setup! is not only a partner who understands us and our needs, but also a partner who understands its business and who realises a 100 percent of our ideas. There is nothing they couldn't cope with!«

Vertex GmbH, Kirchbichl / Innsbruck (Austria)

always up-to-date
